POSITION

System engineer-Researcher/Software engineer on meteorological systems

WORK EXPERIENCE

8/4/2013–Present

System analyst of meterological systems

Geo-K S.r.l., Rome (Italy)

The main covered activities involve the design and realization of a meteorological system for the short term forecast of the thunderstorms using the satellite Meteosat Second Generation data. The system is developed together with the Italian Meteorological Office, which is the final customer. I am the project manager and I manage a small team composed by some PhD and degree students. I'm trying to apply some useful software development technique. Moreover I'm involved into the monitoring, setup and maintenance of the process chains for the HSAT project at the Italian Air force Meteorological office.

As mobile developer, I'm involved into the realization of an app based on a proprietary nowcasting engine.

The app named InstantWeather has been published on 5th September 2014 on the Playstore.

Business or sector Professional, scientific and technical activities

10/6/2002–5/4/2013

System Engineer

T.R.S. S.p.A.

via della Bufalotta,378, 00139 Rome (Italy)

For the first 5 years I was analyst programmer and I worked for the Flight Data Processor (FDP) project. For this project I designed and developed an MFC library emulator under Unix/Linux written in C++.

In the next 3 years I have covered the following positions: requirements analyst and system designer for air traffic control and defense systems. I worked for the European Union Command and Control Information System (EUCCIS) project, leading a team of up to 15 people. On defense systems, I was part of the NATO's Multilateral Interoperability Program (MIP) for the interoperability of the Command and Control defense systems and he designed and developed the Data Exchange Mechanism (DEM) DB-to-DB replicator, written in Java. From 2007 I participated to several international MIP meetings in Germany and Norway. The security clearance was needed by the projects.

From Sept to Dec 2010 I started to develop a new system for the visibility estimation using a commercial camera.

From Jan 2011 to Feb 2012 I worked for the design and development of a DB to DB replicator in the MIP context and I was the Project Manager. The project followed a test driven development process.

The last project, I was involved, was about the development of a nowcasting system, based on my PhD thesis, and its integration with an augmented reality engine.

Business or sector Civil, defense and weather systems

20/10/2007–1/2/2011

Researcher

"Sapienza" University
via eudossiana,18, Rome (Italy)

Development and implementation of a model for the rainfall nowcasting based on the Meteosat IR images using an Ensemble of Neural Networks for his PhD thesis. The model uses a new ensemble approach named DAN (Dynamically Averaging Networks) in order to adapt the ensemble weights. The ensemble output is a short term prediction of the MSG IR images. Some neural models were developed in order to produce meteorological products like Cloud Mask (CM), Multi-sensor Precipitation Estimate (MPE) and Land Surface Temperature (LST). These models were applied to the estimated IR images in order to give the short term prediction of the CM, MPE and LST.

Business or sector Research

1/5/2001–1/5/2002

Researcher

National Institute of Nuclear Physics, Naples (Italy)

Analysis, design and implementation of parallel algorithms for signal processing using MPI.

Business or sector Research

EDUCATION AND TRAINING

1/11/2008–1/2/2011

Environmental Monitoring PhD

"Sapienza" University
via eudossiana,18, Rome (Italy)

Develop of a new model based upon the Meteosat IR images to nowcast extreme meteorological events.

Title of the PhD thesis:"Ensemble Bayesian approach for nowcasting of Geostationary Multispectral Imagery for Hydro-Meteorological Applications".

1/10/1993–29/3/2001

Degree in Computer Science

University of Salerno, Salerno (Italy)

Degree in Computer Science with 109/110.

Title of the thesis:"Rivelazione di segnali gravitazionali con architetture parallele".

The thesis was developed at the VIRGO project for the detection of the gravitational waves.

PERSONAL SKILLS**Mother tongue(s)**

Italian

Other language(s)

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken interaction	Spoken production	
	B1	B2	B1	B1	
English					C1

Levels: A1/A2: Basic user - B1/B2: Independent user - C1/C2: Proficient user

[Common European Framework of Reference for Languages](#)

Communication skills

Team spirit.

Great ability to work into a multicultural environment.

Great capacity to solve technical and organizational problems.

Papers' Reviewer for the Elsevier Remore Sensing Review.

Supervisor for Electronics Engineering's and Computer Science's degree students.

Organisational / managerial skills

Team leader and team manager of up to 15 people.
Very good experience in team management.
Very good experience in project management.
Technical recruiter.

Job-related skills

Very good knowledge of the Object Oriented paradigm using design patterns and UML design paradigm.
Very good knowledge of the standard MIL 498.
Very good knowledge of the neural models and the machine learning in general.
Very good knowledge of the Polaron sw for the Project Management.
Good knowledge of the Agile Development.
Good knowledge of the continuous integration approach.

Good knowledge of the remote sensing in the field of the meteorology.

Computer skills

Very good knowledge of the following operating system: Linux (OpenSuse distribution), Windows XP, Unix Tru64.
Good knowledge of the Android OS.
Very good knowledge of the following languages: C, C++, Java (J2SE), Matlab,.
Very good knowledge of the Standard Template Library and the pthread library.
Good knowledge of the MFC library.
Good knowledge of the following languages: PL/SQL and Javascript.
Very good knowledge of the following DBMS: Oracle 10g, Oracle 11g, MySQL.
Good knowledge of the MS Office suite.
Very good knowledge of the following IDE: Eclipse, Net Beans, Titanium Studio.
Good knowledge of the unit tests tools (JUnit, UtPLSql)
Very good knowledge of software versioning (CVS, SVN, GIT).
Very good knowledge of virtualization tools like ESXi, vSphere
Good knowledge of shell scripting (sh,ksh).
Good knowledge of the Message Parsing Interface (MPI) standard for parallel computing.
Good knowledge of the KML, HDF5 and JSON formats.
Good knowledge of the ECFlow scheduler framework.
Good knowledge of the RESTful pattern for the web services development.
Knowledge of PHP and HTML.

Other skills

Music, Tennis, Cooking and Rugby

Driving licence

B

ADDITIONAL INFORMATION

Great passionate of meteorology.
I designed and developed a Java application in order to translate his own weather forecasts into KMZ format.
These forecasts are built using the nowcasting model developed during the PhD thesis.The forecasts in KMZ format are published on the website www.mondometeo.org
On 5th September 2014 I published on the Playstore an app named InstantWeather based on my PhD studies.

Conferences

- Eumetsat Conference 2014 - Geneva - Swiss 22-26 September 2014. Two Oral Presentations.
- Eumetsat Conference 2013 - Vienna - Austria 16-20 September 2013. Oral Presentation.

- Sea Conference 2013 - Boulder(CO) - USA 1-4 April 2013. Oral presentation.
- Eumetsat Conference 2010 - Cordoba - Spain. Poster Session.RMets Conference 2011 - Exeter - UK. Oral Presentation.
- EGU2009 - Vienna - Austria 19-24 April 2009. Poster Session.
- "MW Remote Sensing" Conference promoted by AIT/CeTeM/MECSA - Rome - Italy 23-24 October 2008.
- Gold Conference 2008 - Frascati - Italy 22-23 May 2008.
- RMets Conference 2005 - Exeter - UK- Poster session.

Seminars

"Ensemble Nowcasting of Geostationary Multispectral Imagery for Hydro-Meteorological Applications using Bayesian Neural Networks" at University of Colorado UCAR/NCAR on 8th March 2012

Memberships

- Member of the Royal Meteorological Society.
- Member of the Italian Remote Sensing Society (AIT).

Honours and awards

- Certificate of Participation at the Eumetsat Summer school 2013
- Certification of Attendance at the Eumetsat Conference 2014
- Certification of Attendance at the ESA Copernicus Appathon 2015
